New residential quarters: housing typology and public spaces

October 16 – 21th, 2017

Vienna University of Technology, Institute of Urban Design and Landscape Architecture

Lviv Polytechnic National University, Institute of Architecture

The excursion for students and tutors of Lviv Polytechnic is devoted to the study of new residential quarters in Vienna, the typology of housing and public spaces in between.

This is important part of students' professional development in context of comparing of design approaches in new housing in Lviv and Vienna. Lviv Politechnic students learnt new planning typologies, design solutions, also materials and technologies in new residential quarters. Also great interest for the participants were the public spaces in residential areas, their typology, quality and the possibilities of social interaction, to which they lead. Another important aspect were the city's public spaces, such as pedestrian streets and city parks, on which we would also like to concentrate our attention.

The knowledge obtained by the students will be applied in diploma design process.

16.10.2017 Monday

10.00-13.00 Arrival to Vienna

15.00-18.30 “Vienna from Above.
Urbanistic impressions from
Kahlenberg”

Concept and organization:

Sarah Gold and Michaela Fodor

Meeting point: TU Wien main
entrance

The most memorable part of the first day was a wonderful walk through the city. This was organized for us by the TU students. We visited the main elements of the central part of the city, revealing the various stages of planning in Vienna. In addition, we enjoyed the atmosphere of urban life by visiting the University of Vienna, the pedestrian street of Mariahilferstrasse, and the Museum Quarter.

It was very interesting for us to learn about how solutions for busy street traffic can work for different types of users.

The day ended with a walk to Kahlenberg where we enjoyed the panoramic view of the city.

17.10.2017 Tuesday

09.00-13.00 Excursion to Erzherzog Karl Str Development and OASE 22+ STAR 22 + Base 22

The second day was devoted to new residential quarters within Vienna. These included Erzherzog Karl Str. Development, OASE 22, STAR 22 and Base 22.

Probably, the most interesting thing was to go inside the buildings and courtyards and to see from inside how they are built. We also received very useful information about the possibilities for social interaction between the inhabitants of each. It was very important for us to explore everything by ourselves, and the highlight of this day was visiting the exhibitions in the MAK museum.

13.00-14.00 Lunch. Free time

14.00-18.00 “Architectural Walking Tour through Vienna City Center”

concept and organization: Ludwig Thanhäuser (Handout)

18.10.2017 Wednesday

09.00-13.00 Excursion to Seestad Aspern www.aspern-seestadt.at

Aspern certainly has made the greatest impression in our study of new residential quarters in Vienna. This satellite city is a rare phenomenon in modern urban practice, so visiting of it was especially important and useful for us. All the specific methods of planning, the use of different materials and elements - all this has enriched our experience. This micro-city is very diverse and undoubtedly deserves the attention of urbanists.

13.00-14.00 Lunch. Free time

14.00-16.00 Architectural museum, Leopold museum

One of the main tasks on this particular day was to visit the Architecture Center of Vienna (Architekturzentrum Wien) and the Leopold museum.

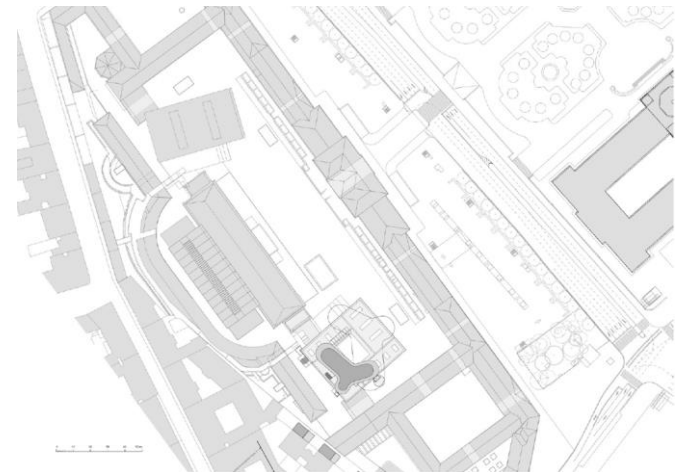

16.00-20.00 “TU Vienna from Inside” Guided visit to the Faculty of Architecture TU Vienna with collective cooking for dinner at Fachschaft Architektur
Concept and organization: Naomi Dutzi
Meeting point: TU Wien main entrance

Our excursion was also diversified by the lectures given by the TU students about outstanding architectural monuments in Vienna.

Visiting the exhibition of diploma projects by the students of Architecture from TU Vienna was very important to us, because we had the opportunity to compare these to our projects.

19.10.2017 Thursday

09.30-11.00 Excursion to Nordbahnhof Urban Development Project

11.00-13.00 Meeting at NORDBAHNHALLE” (Care & Repair; Co_Working) “Free Center – multipurpose Edge”
www.nordbahnhof.org

Composed and organized by: Mara Reinsperger and Stephanie Köck

13.00-14.00 Lunch. Free time

14.00-15.00 Excursion to Hauptbahnhof Urban Renewal District

The excursion to Nordbahnhof Urban Development Project was one of the most spectacular excursions.

A detailed story, an exchange of questions and answers, and professional discussion - all this was very useful to us.

We learnt about the prerequisites for the planning of new residential districts, and the way that the city is guiding and developing a certain amount of housing.

Source: Roman Krushelnyskiy / Nordbahnhof

Source: Olha Kryworutschko / Nordbahnhof

Source: Roman Krushelnyskiy / Rudolf Bednar Park

Source: Nordbahnhof / www.wien.gruene.at

We discussed why the structure of the city's population changes, the immigration and emigration patterns that now characterise the city. The amount of green spaces that is good for a residential quarter and how to make them appear.

14.30-16.30 Excursion to Belvedere museums

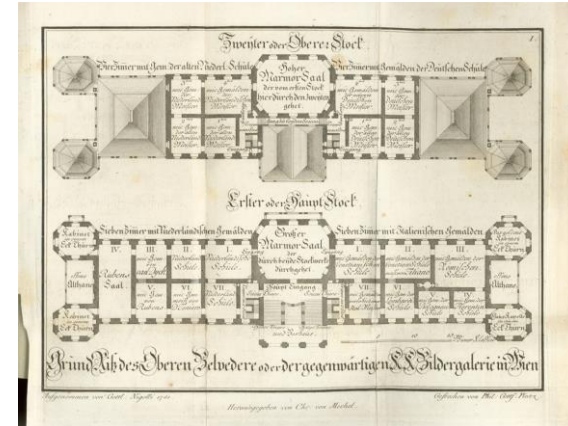

We also visited two main art exhibitions at the Belvedere museum, both with absolutely incredible collections with works from famous artists.

16.30-19.00 Excursion to WU Campus

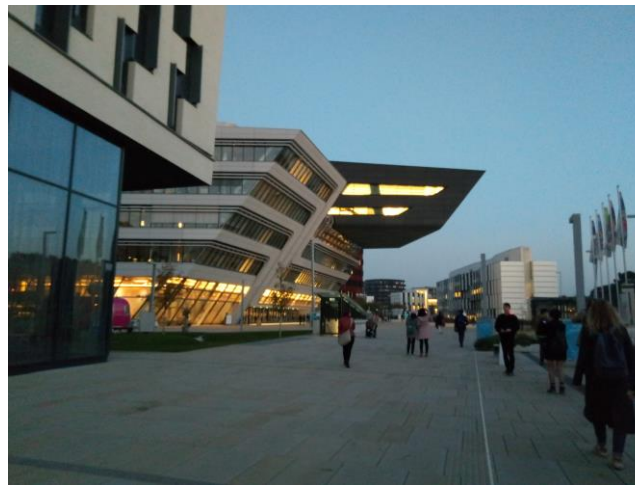

At the end of the day, we visited the Economics University, a good example of educational Architecture for students.

20.10.2017 Friday

**09.00-11.00 Excursion to
Alterlaa housing complex**

<http://www.alt-erlaa.at>

On this day we plunged into an earlier era of social housing Architecture, Architecture from the 1970's. First we visited the Alterlaa district.

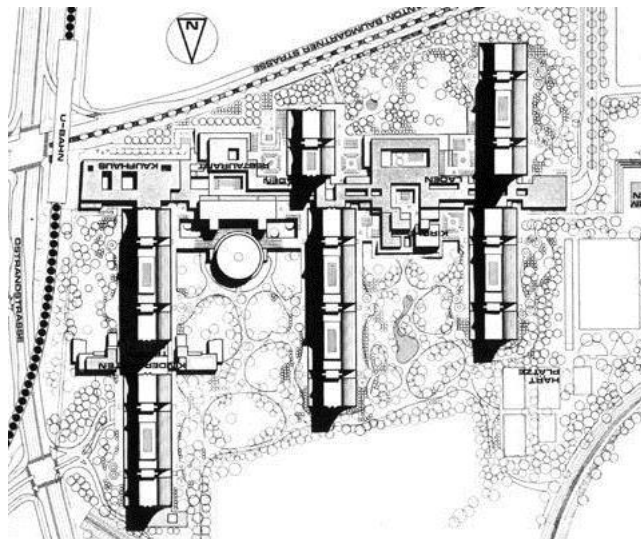

It created a very different impression, that we gladly compared with the impressions from the previously visited satellite city of the 2010's - Aspern. The experience of such a comparison is very important in the education of the Architect.

Source: Alterlaa district / www.nextroom.at

**11.00-12.30 Excursion to
Kabelwerk housing district**
www.kabelwerk.at

In order to add to this comparison of residential architectural typologies we have added the housing of 1990's, more specifically the Kabelwerk housing district.

13.00-14.00 Lunch. Free time
**14.00-15.00 Excursion to
Schonbrunn palace**

In the middle of the day we visited Schonbrunn palace. It was really impressive to observe this great complex relationship between landscape and the palace Architecture.

**15.00-16.00 Excursion to
Albertina museum (optional)**
16.00-20.00 Free time

**20.00-21.00 Common dinner
(Resselpark)**

The final activity on this day was a communal dinner together with Austrian students and tutors.

21.10.2017 Saturday

08.22 Excursion Wien-Melk-Krems-Wien (by train)

Meeting point: Hbf railway station
at the main entrance at 08.00

The final day of the excursion we spent in Melk and Krems. It was really good experience to compare Vienna with some smaller cities (towns?).

In the Melk monastery we visited three different art exhibitions, after that we explored the city structure.

12.00-13.00 Lunch. Free time.

The next step was a boat excursion on the Danube to Krems with a lot of spectacular views and old architectural sights.

Source: Roman Krushelnyskyi / Melk

Source: Roman Krushelnyskyi / Öffentliches Stiftsgymnasium der Benediktiner in Melk

Source: Roman Krushelnyskyi / Melk. Danube

Whilst in Krems did a walking trip to the Caricature museum (Karakatur Museum) and modern buildings. We also had a good chance to compare the big and small train stations on the way to the hostel .

17.19-18.45 Departure to Wien
18.45-21.00 Free time

It was our last day in Vienna so when we got back to the hostel the Austrian students came to see us before we went back home.

21.00 Departure to Lviv
