

location

Charkiv

Linear City

Myru str.

Main idea

before: bad condition of parkline and low income of the social structure
high criminality level
green space waste

after: creating comfortable space for working and spending time in
putting lot of function for activating the site
work places near the residential territories
saving historical green territory

Road Connection

basic regular structure of the street space

moving road curve for connecting park and public function (from regular to irregular structure)

underground road and parking space

business function expansion

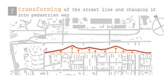

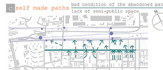

creating semi-public spaces

creating public green space

expansion of functions into the park line

injection of functions:
